

Sustainable Certification: Grapes under this Agreement will be farmed in compliance with Sustainability in Practice (SIP) Certified® sustainable winegrowing standards. Any finished wine made with at least 85% SIP Certified grapes can apply to use the SIP Certified logo on the bottle. Application involves a chain-of-custody audit of winemaking records for 20% of the applied-for wines. Applications should be submitted prior to bottling. Certification must be renewed with each vintage. Applications can be submitted year-round at <https://app.sipcertified.org>. Approved wines may use the SIP Certified logo on the front or back label, and in materials such as tasting notes, distributor packages, and signage.

There are two distinctions in logo usage:

1. **SIP Certified® Wine** – applies when at least 85% of grapes are SIP Certified, regardless of where the wine is made.
2. **SIP Certified® Wine Made at a SIP Certified® Winery** – applies when the wine is both:
 - a) made with at least 85% SIP Certified grapes
 - b) produced at a certified winery

These wines may use an enhanced version of the logo that includes “SIP Certified Vineyard & Winery” language.

All logo use must follow SIP Certified® Style Guide labeling guidelines at <https://app.sipcertified.org/preview/docs>.
